DARPA DEMO DAY

BREAKTHROUGH TECHNOLOGIES FOR NATIONAL SECURITY

DATE	TIME	LOCATION
WEDNESDAY 11 MAY 2016 (RAIN DATE 12 MAY 2016)	1000 – 1400	PENTAGON CENTER COURTYARD

ABOUT DEMO DAY

Demo Day provides the DoD community with an up-close look at DARPA's diverse portfolio of innovative technologies and military systems at various stages of development and readiness, spanning every military domain from undersea to outer space and across all of DARPA's strategic focus areas, from sensors and microsystems to cyber and spectrum to biological technologies and counterterrorism. More than 80 exhibits will be on display.

WHO CAN ATTEND

All Pentagon badge holders are welcome—as are visiting U.S. Government civilian/military CAC holders and blue Intelligence Community badge holders, who can receive a temporary, no-escort-required badge by checking in at the Pentagon Visitor's Center near the Metro Entrance.

ABOUT DARPA

For more than fifty years, the Defense Advanced Research Projects Agency has held to a singular and enduring mission: to make pivotal investments in breakthrough technologies for national security. In close collaboration with our Defense R&D partner agencies, DARPA engages top-tier public and private innovators—including academics, companies large and small, and colleagues across the DoD and government-to deliver on that mission, transforming revolutionary concepts and even seeming impossibilities into practical capabilities.
