DPA27BZ02-DV003
Human Universal Remote
Frequently Asked Questions (FAQs)

1. Would a passive approach to autonomy tasking be considered responsive to this topic?
   A: Yes, if the approach could feasibly meet the *Jam Session* gesture accuracy metric of 92% true-positive recognition across the user pool.

2. If the program requires intentional commands, would a hybrid approach be in scope?
   A: Yes. As the solicitation states, "The cited references serve as representative baselines of the state-of-the-art human machine interfaces and do not limit the scope of acceptable technical approaches."
